

I find it appauling that some banks in Indiana are attempting to have the state "do not call" list overthrown so they will be able to call me anytime they wish. I am on the list and do not want to be bothered by solicitors when I get home in the evenings. if I need their services, I will call them. it is my thought that Federal agencies shouldn't even attempt to strong arm state governmnet. I am confident that there are far more residents of Indiana who feel the way i do as opposed to those who enjoy their phones ringing continuously. Thank you and I trust you won't allow these financial institutions to ruin our home lives.
